

**TB-0336**

## **MIGRATION OF THE SYBASE 11 TO SYBASE 12 CLIENT ON THE ACTUATE PRODUCTION SERVER**

Issue Date: March 18, 2004  
Effective Date: March 27, 2004  
Section/Group: Operations  
Submitted by: John Kane  
Approved by: Norm Johnson

---

The SYBASE 12 client has been installed on ITSWEB15 (Development Actuate Server). DHRM has successfully tested their applications with the new client.

If your agency uses Actuate Reports with SYBASE, ITS recommends that you test your applications with the new client.

A change request has been submitted for March 27, 2004 to migrate the SYBASE 12 client to the Actuate Production Server.

The migration will take place on that date unless John Kane (801-537-9025; [jkane@utah.gov](mailto:jkane@utah.gov)) or Marsha Dotson (801-538-3563; [mdotson@utah.gov](mailto:mdotson@utah.gov)) are contacted prior to the March 25, 2004 Change Management meeting.
